BeeGFS Receives Honors in 2020 HPCwire

Readers' and Editors' Choice Awards

17th Annual HPCwire Awards Presented to Leaders in the Global HPC Community

SAN DIEGO, Ca. — November 16, 2020 — BeeGFS has been recognized in the annual *HPCwire* Readers' and Editors' Choice Awards, presented digitally during the virtual 2020 International Conference for High Performance Computing, Networking, Storage and Analysis (SC20) via HPCwire.com. The list of winners was revealed and is accessible through the *HPCwire* virtual booth, and on the *HPCwire* website, www.HPCwire.com. BeeGFS was recognized with the following honor(s):

- Readers' Choice: **Top 5 New Products or Technologies to Watch**

The annual, highly coveted, HPCwire Readers' and Editors' Choice Awards are determined through a rigorous nomination and voting process that engages the global *HPCwire* community and includes intensive review and selections from the *HPCwire* editorial team. The awards represent prestigious recognition from the HPC community and have become a proud, prominent feature of the publication. These accolades are revealed each year to kick off the annual supercomputing conference, which showcases high performance computing, networking, storage, and data analysis.

"Each year we look forward to connecting with our HPC community while recognizing exceptional industry innovation at SC. While it saddens us that we cannot physically connect with one another this year, we take great pride in bringing the community together through our new digital format for the Reader's and Editors' Choice Awards," said Tom Tabor, CEO of Tabor Communications, publisher of HPCwire. "This pandemic has brought our community together in ways we never imagined possible. The recent collaborations, innovative research, and breakthroughs in technology have not gone unnoticed. It is through these critical HPC efforts that we may address and mitigate the impact of problems facing humanity today and those that may challenge us in the future. We congratulate and honor all who have exceeded expectations and have truly excelled despite the challenges this pandemic has presented in 2020. Our congratulations go out to all the winners and nominees. We hope to see our community face to face next year to celebrate in person!"

More information on these awards can be found at the HPCwire website (<http://www.HPCwire.com>) or on Twitter through the hashtag: #HPCwireAwards.

About HPCwire

HPCwire is the #1 news and information resource covering the fastest computers in the world and the people who run them. With a legacy of world-class editorial and journalism dating back to 1987, HPCwire is the news source of choice for science, technology and business professionals interested in high performance and data-intensive computing. Visit *HPCwire* at www.hpcwire.com.

About ThinkParQ GmbH

ThinkParQ GmbH strives to create and develop the fastest, most flexible, and most stable solutions for every performance-oriented environment. Established in 2014 as a spinoff from the Fraunhofer Center for High-Performance Computing, ThinkParQ drives the research and development of BeeGFS, and works closely with system integrators to create turn-key solutions. Visit <http://www.thinkparq.com> for further information.

About BeeGFS

BeeGFS is one of the leading parallel cluster file systems, developed with a strong focus on performance and designed for very easy installation and management. If I/O-intensive workloads are your problem, BeeGFS is the solution. For more information, visit www.beegfs.io
